START HERE

# Start here: fixes for this week

Ten fixes you can make this week, each in under an hour. Below them, the whole playbook in ten lines. The chapters explain each fix in full.

## 10 fixes that take under an hour each

10

- [ ] 01 Add a pre-filled WhatsApp button to your most visited treatment page
- [ ] 02 Save a first-reply script with three questions, in each language
- [ ] 03 Set WhatsApp hours and an away message asking for photo and country
- [ ] 04 Show a from-price with three inclusions on your best-selling treatment
- [ ] 05 Add days, fly-home day and inclusions to each treatment page
- [ ] 06 Replace 'best clinic' with one checkable fact
- [ ] 07 Compress your ten heaviest images to WebP, under 200 KB
- [ ] 08 Replace the hero video with one photo
- [ ] 09 Cut the form to five fields; show the reply time after sending
- [ ] 10 Start a lead tracker sheet and log today's inquiries

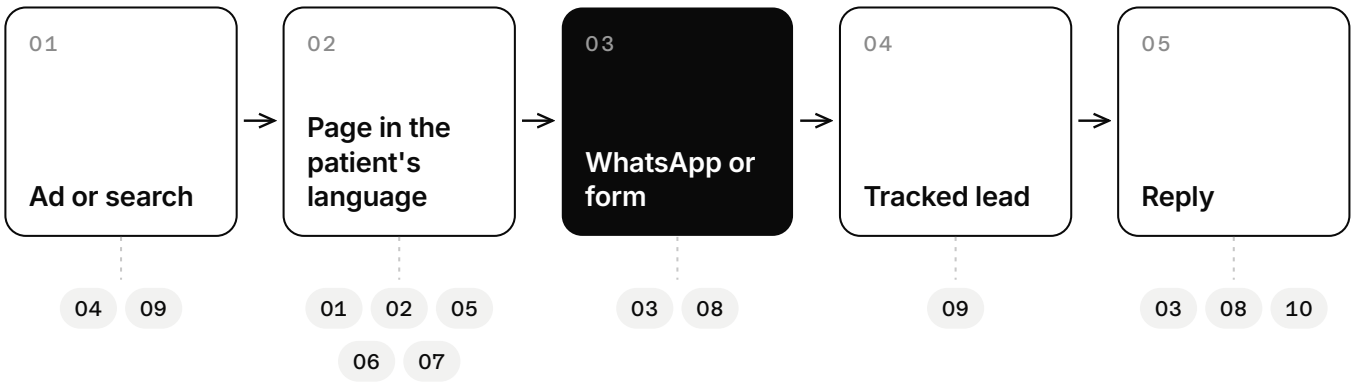

IF YOU READ NOTHING ELSE

# The playbook in 10 lines

| | |
|---|---|
| 01 | Patients abroad choose on a phone, in their own language. |
| 02 | The first message comes by WhatsApp. Put a pre-filled button on every treatment page. |
| 03 | Reply within minutes, with three questions. |
| 04 | Show price and days openly: from-price, inclusions, fly-home day. |
| 05 | One page explains the whole trip, with a named person at each stage. |
| 06 | Build trust with facts patients can check. |
| 07 | Keep treatment pages under 2.5 seconds on a real phone. |
| 08 | Log every lead with its source. Send bookings to Google Ads weekly. |
| 09 | Ask for reviews at the last visit. Follow up at one week, one month, six months. |
| 10 | Want it done for you? The Clinic Website package builds chapters 1 to 8. The Clinic Growth System adds tracking, CRM and the ads handoff (chapters 9 and 10). |

## The inquiry path

The path from the first click to your first reply. Each chapter closes a gap somewhere on it.

HOW TO USE THIS

# Start with your three lowest answers.

Your audit shows where you lose patients. This playbook fixes it. Each of the 10 chapters matches one audit question, with a checklist and templates. Start with your three lowest answers. No new website needed.

**10**
chapters, each one stands on its own

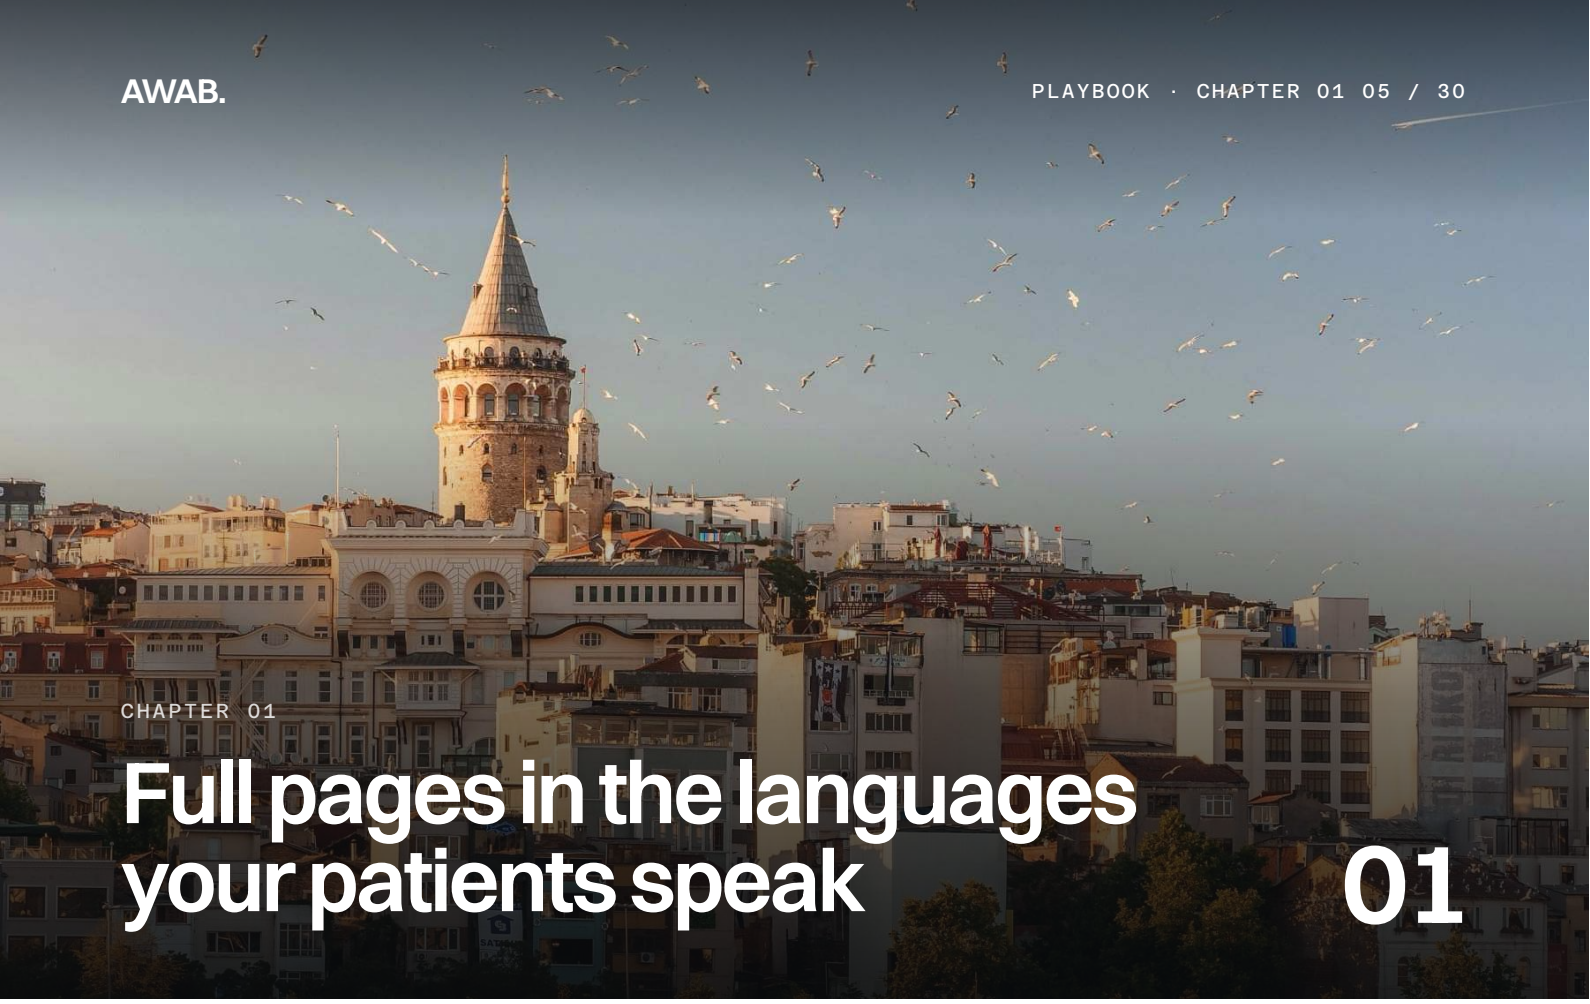

**17**
copy-paste templates

**30**
days, one plan week by week

**40**
minutes of reading in total

## Contents

| | | | |
|---|---|---|---|

CHAPTER 01

# Full pages in the languages your patients speak

01

IN SHORT

AFTER THIS CHAPTER

You will know which pages to translate first, and how to brief a translator.

READING TIME

4 min

WHAT THE GAP COSTS YOU

Patients compare clinics on a phone, in their own language. If your pages are in English, they pick another clinic.

An Arabic ad that opens an English page wastes the click.

The fix is small: two or three languages, key pages only.

## Steps

06

**1** **Pick two or three markets, not ten**

Count the countries in six months of inquiries. Pick the two or three top languages. Each one adds pages to maintain.

**2** **List the pages that bring inquiries**

Each language needs treatments, doctors, the journey page, prices, FAQ, contact and thank-you. The blog can wait. A home page alone is not enough.

**3** **Have pages written, not translated**

Give a native medical writer the English page and the brief below. Machine translation can draft. A native speaker must finish.

### 4 Match the layout to the language

Arabic reads right to left, so the menu, icons, forms and buttons must flip too. French and German are longer, so leave room in buttons.

### 5 Make the language switch easy to find

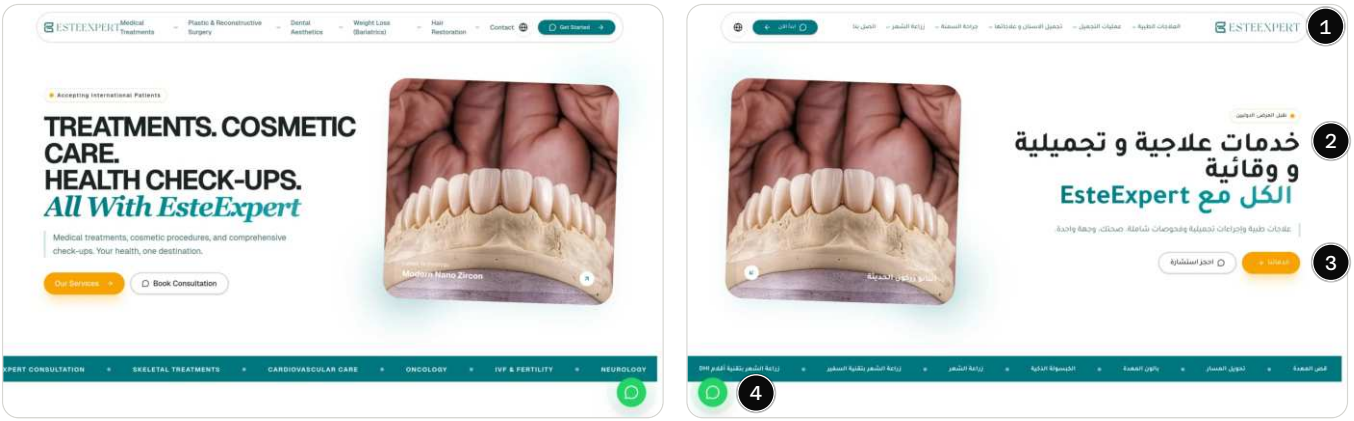

Put it in the header, visible on a phone. Write each language in its own script: العربية, Français, Türkçe. Suggest a language, never force one.

### 6 Keep all languages in sync

Give each language its own URL, title and hreflang tags (code that tells Google the page language). Change prices and doctors in all languages the same day.

---

REAL EXAMPLE

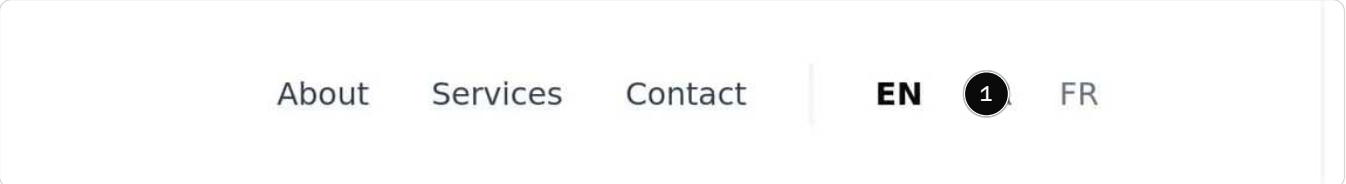

EsteExpert, home page in English and in Arabic. The Arabic version is mirrored right-to-left, not only translated.

1. Logo and menu move to the right
2. Headline and text aligned right
3. Buttons start from the right
4. WhatsApp button moves to the bottom-left

---

REAL EXAMPLE

Jouvence, header. The language switch sits in the header, visible without opening a menu.

1. Language switch: EN, AR, FR

## Checklist

08

- [ ] Two or three languages, chosen from real inquiries
- [ ] Every treatment page in each language
- [ ] Doctors, journey, prices, FAQ and contact in each language
- [ ] Written or checked by a native medical writer
- [ ] Arabic fully right to left, forms and buttons too
- [ ] Language switch visible on a phone
- [ ] Own URL, title and hreflang per language
- [ ] One person keeps all languages in sync

TEMPLATES FOR THIS CHAPTER, IN YOUR TEMPLATE PACK

T01 **Translation brief for one market** Template Pack, p. 03

## Mistakes to avoid

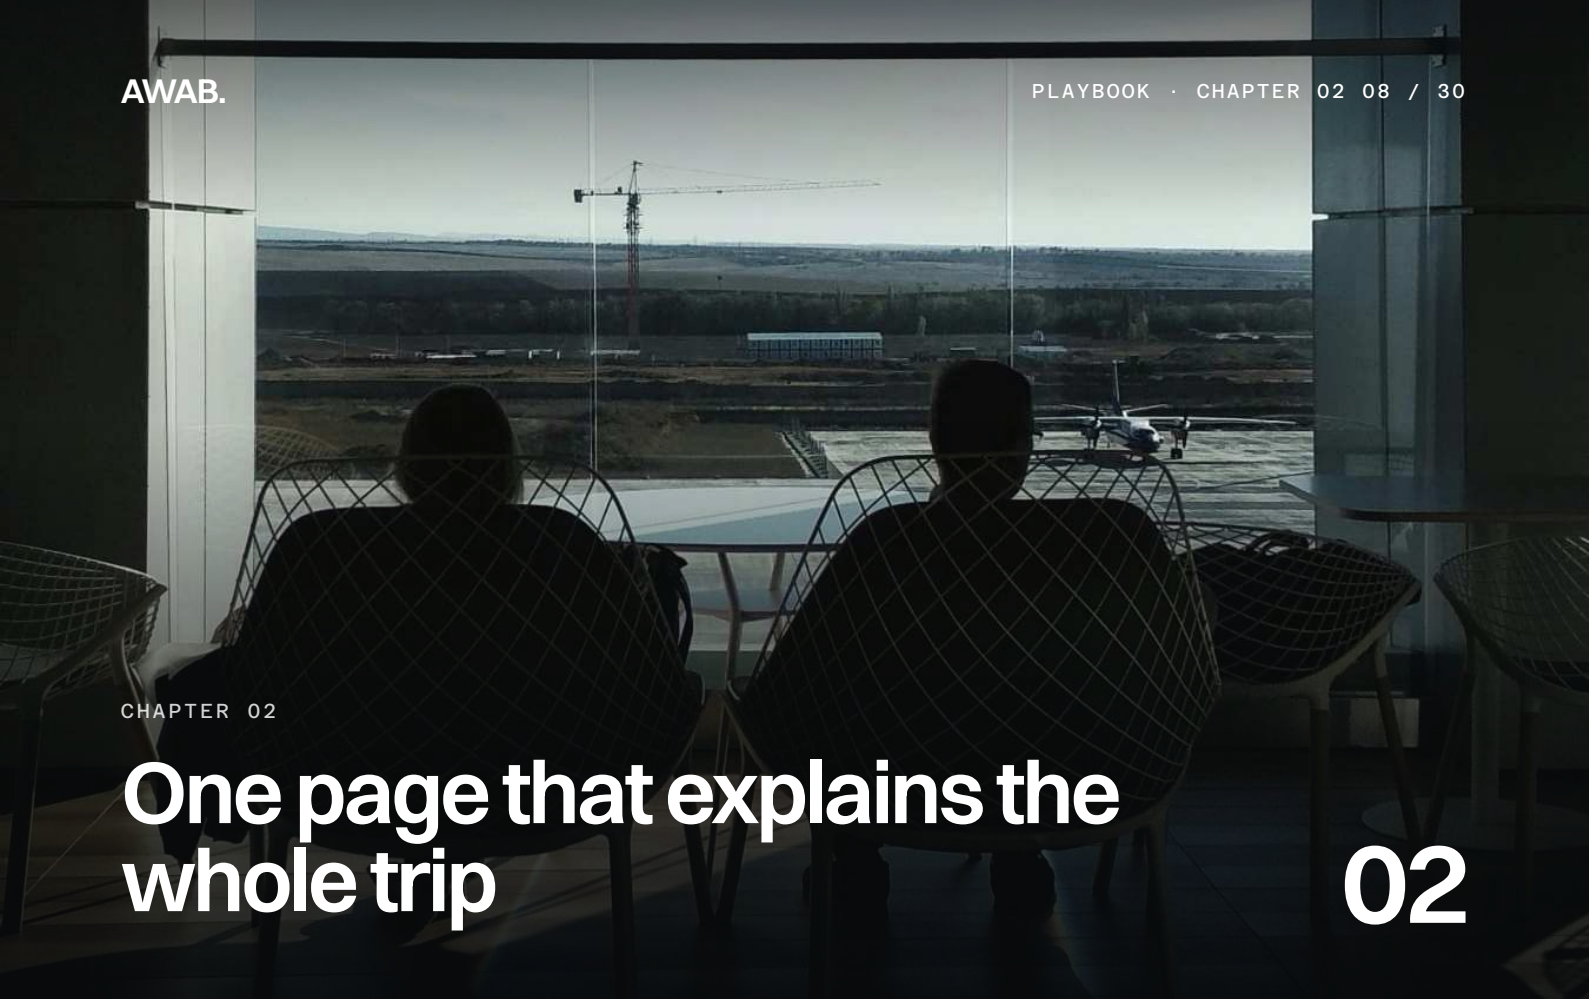

04

- × Only the home page translated
- × A plugin that breaks Arabic layout
- × Language switch hidden in a menu
- × A price changed in one language only

DONE WHEN

A patient goes from your ad to WhatsApp without seeing English.

01

CHAPTER 02

# One page that explains the whole trip

02

IN SHORT

AFTER THIS CHAPTER

One page answers travel questions before patients ask.

READING TIME

4 min

WHAT THE GAP COSTS YOU

Patients rarely doubt the treatment. They worry about the trip: pickup, hotel, days, aftercare.

Your team answers these questions on WhatsApp every day. One page saves that time.

Then a reply is short: 'See this page. Here is your plan.'

## Steps

06

1. **Collect the real questions**

   Ask coordinators for the ten travel questions they hear most. Use the patients' words as headings.

2. **Follow the patient's order**

   Inquiry, plan, travel, stay, treatment days, aftercare, follow-up from home. For each, say what happens, how long, and who does what.

3. **Name the practical details**

   Name the airports, pickup, hotel and distance. Say if a companion stays free. Give days, fly-home day and payment methods.

4 **Name a person for each stage**

Show a named coordinator with photo and languages. Name an aftercare contact with hours. Patients fear being forgotten after paying.

5 **Add a summary to treatment pages**

Add three lines: days in Istanbul, fly-home day, what is included. Link to the full page.

6 **Use it in replies**

Save the link as a WhatsApp quick reply. The page explains. The coordinator books.

## Checklist

08

- [ ] Journey page in every language
- [ ] Airports, pickup and hotel named
- [ ] Companion rules and payment methods
- [ ] Short summary on every treatment page
- [ ] Seven stages, from first message to home
- [ ] Days and fly-home day per treatment
- [ ] Named coordinator and aftercare contact
- [ ] Link saved as a quick reply

TEMPLATES FOR THIS CHAPTER, IN YOUR TEMPLATE PACK

T02 **Patient journey page outline with sample sentences** Template Pack, p. 03

## Mistakes to avoid

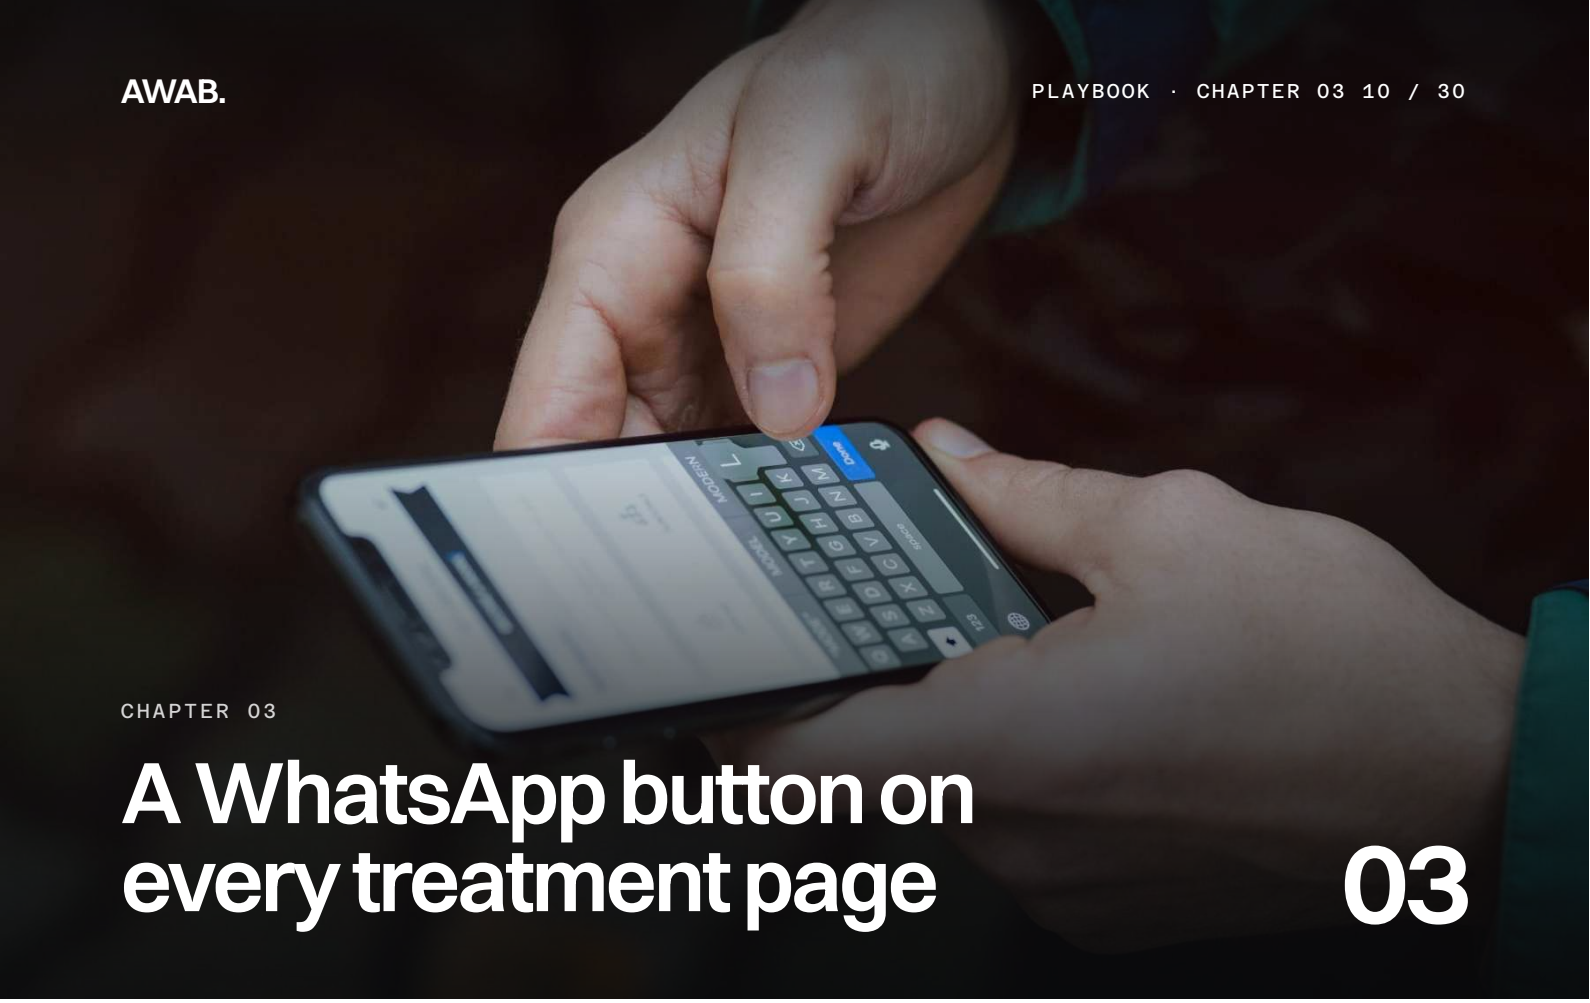

04

- × A sales pitch instead of a schedule
- × No named aftercare contact
- × 'It depends' instead of a range of days
- × The page hidden in the footer

DONE WHEN

A coordinator answers any travel question with one link and two sentences.

02

CHAPTER 03

# A WhatsApp button on every treatment page

03

IN SHORT

AFTER THIS CHAPTER

**Every treatment page opens a ready WhatsApp chat, and your team has scripts.**

READING TIME

5 min

WHAT THE GAP COSTS YOU

Most patients abroad use WhatsApp, not forms. If the button is hard to find, they leave.

Patients often choose the clinic that answers first, with good questions.

This is often your biggest win, and it takes one afternoon.

## Steps

06

1. **Use a clinic-owned Business number**

   Not a coordinator's own phone. Add your name, address, website and languages. Set business hours and an away message.

2. **Build one link per treatment**

   Use https://wa.me/<number>?text=<message>, with the number in international format, no plus or spaces. In the message, a space is %20 and a new line is %0A.

### 3 Place the button within thumb reach

On phones, fix it to the bottom of the screen. On computers, put it in the header and after the prices. Use words, not only an icon.

### 4 Write the first reply in advance

Greet them in their language. Ask three things: which treatment, when they can travel, and a photo. Save it as a quick reply.

### 5 Set a reply time you can keep

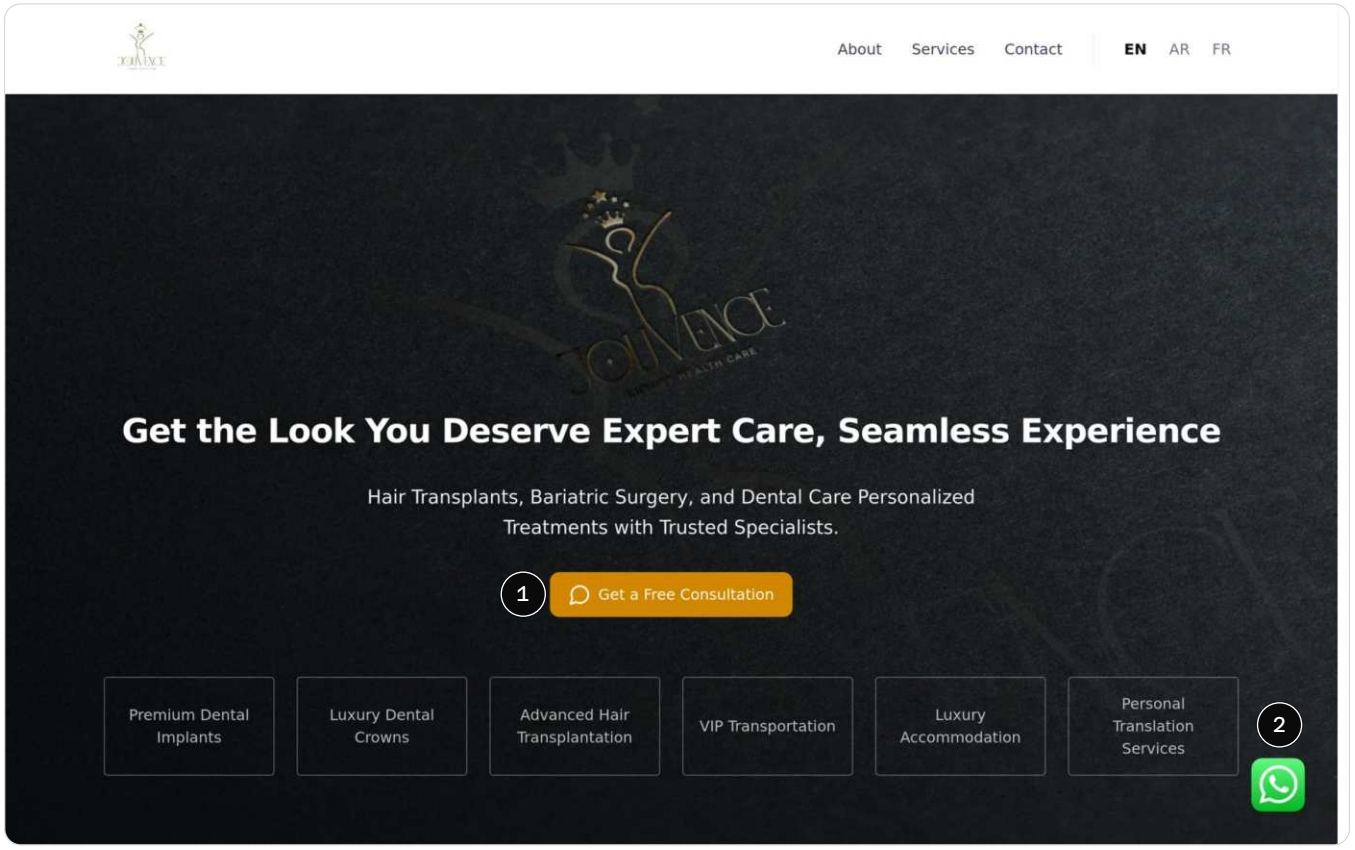

For example: 15 minutes in working hours, 09:00 for night messages. Write it on the page, then keep it.

### 6 Track the clicks

Record each click with its page and treatment (chapter 9). Then you know which page or ad brought the chat.

---

REAL EXAMPLE

Jouvence, home page. A consultation button in the first screen and a WhatsApp button in the corner.

1 Consultation button in the first screen

2 WhatsApp button in the corner

## Checklist

08

- [ ] WhatsApp Business on a clinic number
- [ ] Button on every treatment page, fixed on phones
- [ ] Ready-made message names the treatment
- [ ] Away message in each language
- [ ] First-reply script saved per language
- [ ] Reply time shown and checked weekly
- [ ] Button has words, not only an icon
- [ ] Each click is tracked

TEMPLATES FOR THIS CHAPTER, IN YOUR TEMPLATE PACK

| | | |
|---|---|---|
| T03 | **Pre-filled WhatsApp messages per treatment** | Template Pack, p. 04 |
| T04 | **First-reply scripts for the clinic team** | Template Pack, p. 05 |

## Mistakes to avoid

04

- × Button only on the contact page
- × A personal number that leaves with the coordinator
- × First reply 'How can we help?' with no questions
- × No away message for night messages

DONE WHEN

One tap opens a chat naming the treatment, and a test gets a fast scripted reply.

03

CHAPTER 04

# Pages that load in under 3 seconds on a phone

04

IN SHORT

AFTER THIS CHAPTER

**Your treatment pages pass a phone speed test and stay fast.**

READING TIME

**4 min**

WHAT THE GAP COSTS YOU

Patients often come from an ad, on mobile data. If the page is slow, they leave, and you still pay for the click.

Google ranks slow pages lower and charges more for them in Ads.

Usual causes: big images, video, sliders, extra scripts. All are fixable without a redesign.

## Steps

06

1. **Test treatment pages, not the home page**

   Test three treatment pages per language in Google PageSpeed Insights (mobile). Aim for LCP (main content shows) 2.5 s or less, INP (tap response) 200 ms or less, CLS (page jumps) 0.1 or less.

2. **Shrink every image**

   Save photos as WebP, at display size, under about 200 KB. Give each image a width and height so the page does not jump.

3. **Remove video and sliders**

   Use one strong photo instead of a background video. Replace sliders with your best single image.

**4** **Cut scripts you do not use**

List every outside script: chat widgets, old pixels, extra fonts. Keep your analytics, your ad pixel and one chat tool. Remove the rest.

**5** **Use caching and a CDN**

Ask your developer for caching, compression and a CDN (servers near the patient). It is usually just a setting.

**6** **Test on a real phone**

Use a mid-range Android on 4G. WhatsApp should be tappable within three seconds. Test again after each content change.

## Checklist

08

- [ ] Three pages per language tested, scores logged
- [ ] Images WebP, right size, under 200 KB
- [ ] Unused scripts removed
- [ ] Checked on a real phone, mobile data
- [ ] LCP 2.5 s or less, INP 200 ms or less, CLS 0.1 or less
- [ ] No video or sliders on treatment pages
- [ ] Caching, compression and CDN on
- [ ] Monthly re-test with an owner

TEMPLATES FOR THIS CHAPTER, IN YOUR TEMPLATE PACK

T05 **Monthly speed log** Template Pack, p. 05

## Mistakes to avoid

04

- × Testing only the home page, on office Wi-Fi
- × Keeping a video because it 'looks premium'
- × Full-size photos straight from the camera
- × Adding a second chat widget

DONE WHEN

Treatment pages score green on mobile, and WhatsApp works within three seconds.

04

CHAPTER 05

# Treatment pages that answer price and recovery 05

IN SHORT

AFTER THIS CHAPTER

**Each treatment gets a page with price, inclusions, days and fly-home day.**

READING TIME

5 min

WHAT THE GAP COSTS YOU

Every patient wants the price and recovery time. Hide them and patients ask a clinic that shows them.

Clear pages bring fewer price shoppers. Your coordinators book instead of quoting all day.

A from-price with inclusions looks professional. A very low price looks risky.

## Steps

06

1 **One page per treatment**

Not one 'Services' page. Each treatment gets its own page and URL. Each should work alone as an ad landing page.

2 **Use one structure**

What it is, how you do it, days and visits, fly-home day, price and inclusions, materials, doctors, results, FAQ, WhatsApp. See the outline below.

### 3 Show a from-price and inclusions

Use an honest price for a simple case. List what is and is not included. Name the brands you really use.

### 4 State days and recovery

Give days, visits, fly-home day and back-to-work day. Describe the first week home. A range is fine. Vague is not.

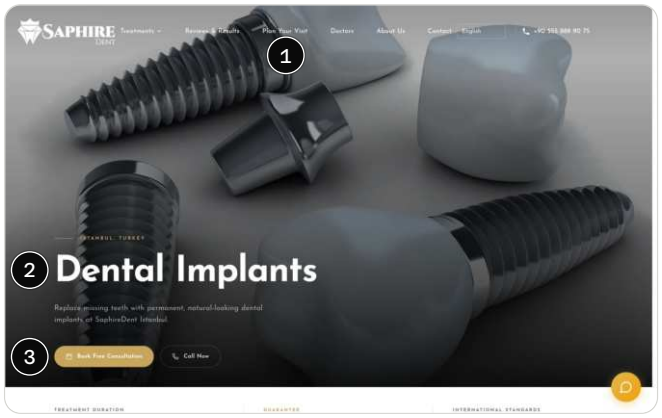

### 5 Answer the five real questions

Answer the five questions you hear most, honestly. Include the hard ones: pain, failure, problems at home.

### 6 Finish with one action

End with the WhatsApp button for this treatment and a short form. Nothing else.

REAL EXAMPLE

SaphireDent, dental implants page. One treatment per page, with the trip one click away.

1. Plan Your Visit in the main menu
2. Treatment name as the page title
3. Consultation button in the first screen

REAL EXAMPLE

EsteExpert, hair transplant page. The patient sees where they are and how to ask.

1. Breadcrumb back to the treatment group
2. Treatment and methods in the title
3. Book a consultation
4. WhatsApp button on the treatment page

## Checklist

08

- [ ] Own page and URL per treatment, every language
- [ ] From-price with what is and is not included
- [ ] Materials and brands named
- [ ] Days, visits and fly-home day
- [ ] First week at home described
- [ ] Five honest FAQ
- [ ] Doctors linked by name
- [ ] WhatsApp button and form at the end

TEMPLATES FOR THIS CHAPTER, IN YOUR TEMPLATE PACK

| | | |
|---|---|---|
| T06 | **Treatment page outline with sample copy (dental implants)** | Template Pack, p. 06 |
| T07 | **Price range table** | Template Pack, p. 07 |

## Mistakes to avoid

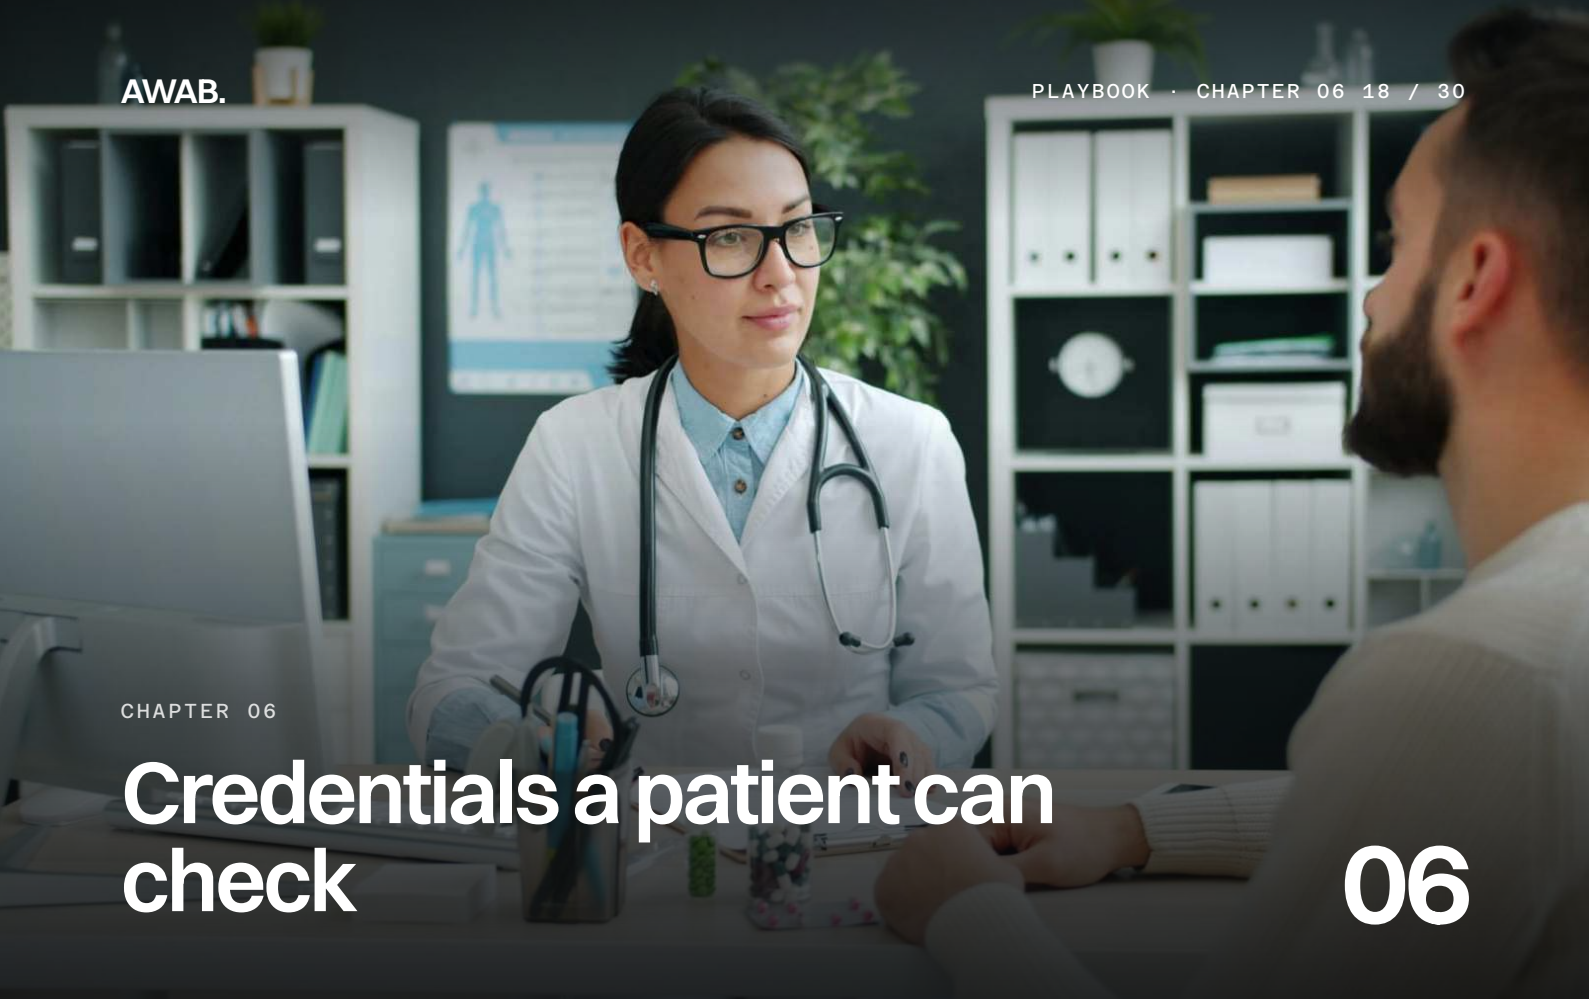

04

- × One 'Our services' page with no prices or days
- × 'Contact us for price' on every page
- × A from-price no real case gets
- × 'Premium' materials with no brand named

DONE WHEN

Patients ask about dates, not 'how much?'.

05

CHAPTER 06

# Credentials a patient can check

06

IN SHORT

AFTER THIS CHAPTER

Every doctor gets a profile patients can check.

READING TIME

3 min

WHAT THE GAP COSTS YOU

## Patients must trust you before they write. Real names and facts build trust.

Many patients search the doctor's name. If they find nothing, they leave.

It costs one photo session and one hour per doctor.

## Steps

06

1. **One profile page per doctor**

   Use the registered name and a real photo from the clinic. Add specialty, years and treatments. Link profiles and treatment pages both ways.

2. **List what can be verified**

   University, training, registration number, memberships, rough number of procedures. A patient should be able to check each one.

3. **Show accreditations where they matter**

   Show them on the about page and each treatment page, linked to the issuer. If you hold Turkey's health tourism authorisation, show it.

4 **Remove what cannot be proven**

Replace 'best clinic' and 'world-class' with facts: years, numbers, names. Slogans create doubt.

5 **Show the people patients meet**

Show coordinators with names, photos and languages. They are the first contact.

6 **Keep it current**

When staff change, update every language that week. An old profile invites complaints.

## Checklist

08

- [ ] Profile per doctor, real clinic photo
- [ ] Degrees, registration and memberships listed
- [ ] Rough number of procedures
- [ ] Profiles and treatment pages linked
- [ ] Accreditations linked to the issuer
- [ ] No 'best' or 'world-class' claims
- [ ] Coordinators shown with names and languages
- [ ] Profiles updated when staff change

TEMPLATES FOR THIS CHAPTER, IN YOUR TEMPLATE PACK

T08 **Doctor profile template** Template Pack, p. 07

## Mistakes to avoid

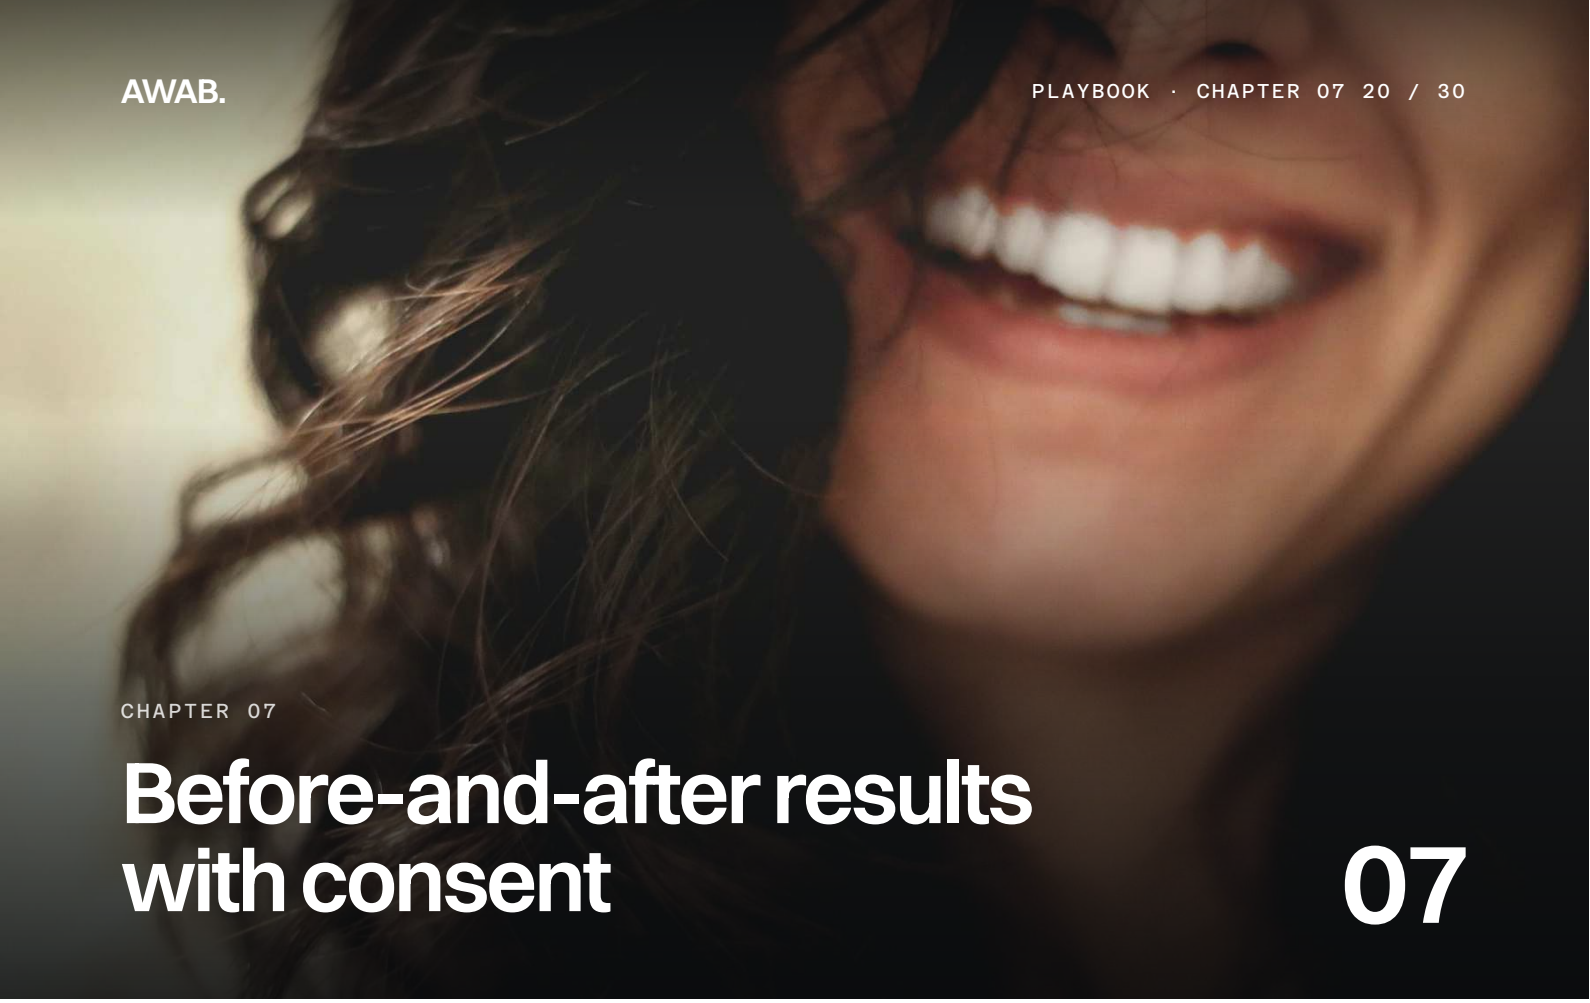

04

- × Stock photos of models
- × 'Our expert team' with no names
- × Footer logos with no link
- × A profile for a doctor who left

DONE WHEN

Each doctor's facts check out online.

06

CHAPTER 07

# Before-and-after results with consent

07

IN SHORT

AFTER THIS CHAPTER

**You get a consistent gallery, with signed consent for each case.**

READING TIME

3 min

WHAT THE GAP COSTS YOU

Results are your best proof. Without them, patients compare on price.

Without written consent, one complaint can take down the whole gallery.

The rules: same angle, same light, short caption, written consent.

## Steps

06

1. **Set a standard shot**

   Teeth: front smile, same distance and light. Hair: front, top, both sides. Face: front and side, no makeup. Put the rules on a card in the room.

2. **Take the before photo every time**

   Take it at the first visit, before treatment. Take the after photo at the final check, and again when healed.

3. **Get written consent**

   One page: what you show, where, how long, and that they can withdraw. Keep it in the file. This is not legal advice, so ask your lawyer.

4 **Caption with three facts**

Age range, treatment, days. No names. For example: '40s, All-on-4, 2 visits of 6 days.'

5 **Show cases on treatment pages**

Show three to six cases on each treatment page, where patients decide. Before and after side by side, same size.

6 **Be honest about limits**

Add one line: results vary. If a face is hidden, say the patient asked.

## Checklist

08

- [ ] Standard shot card in each room
- [ ] Before photo for every patient
- [ ] After photo at final check and follow-up
- [ ] Signed consent kept in the file
- [ ] Caption: age range, treatment, days
- [ ] Three to six cases per treatment page
- [ ] Hidden faces labelled as patient request
- [ ] 'Results vary' line under the gallery

TEMPLATES FOR THIS CHAPTER, IN YOUR TEMPLATE PACK

T09 **Before-and-after consent checklist (not legal advice)** Template Pack, p. 08

## Mistakes to avoid

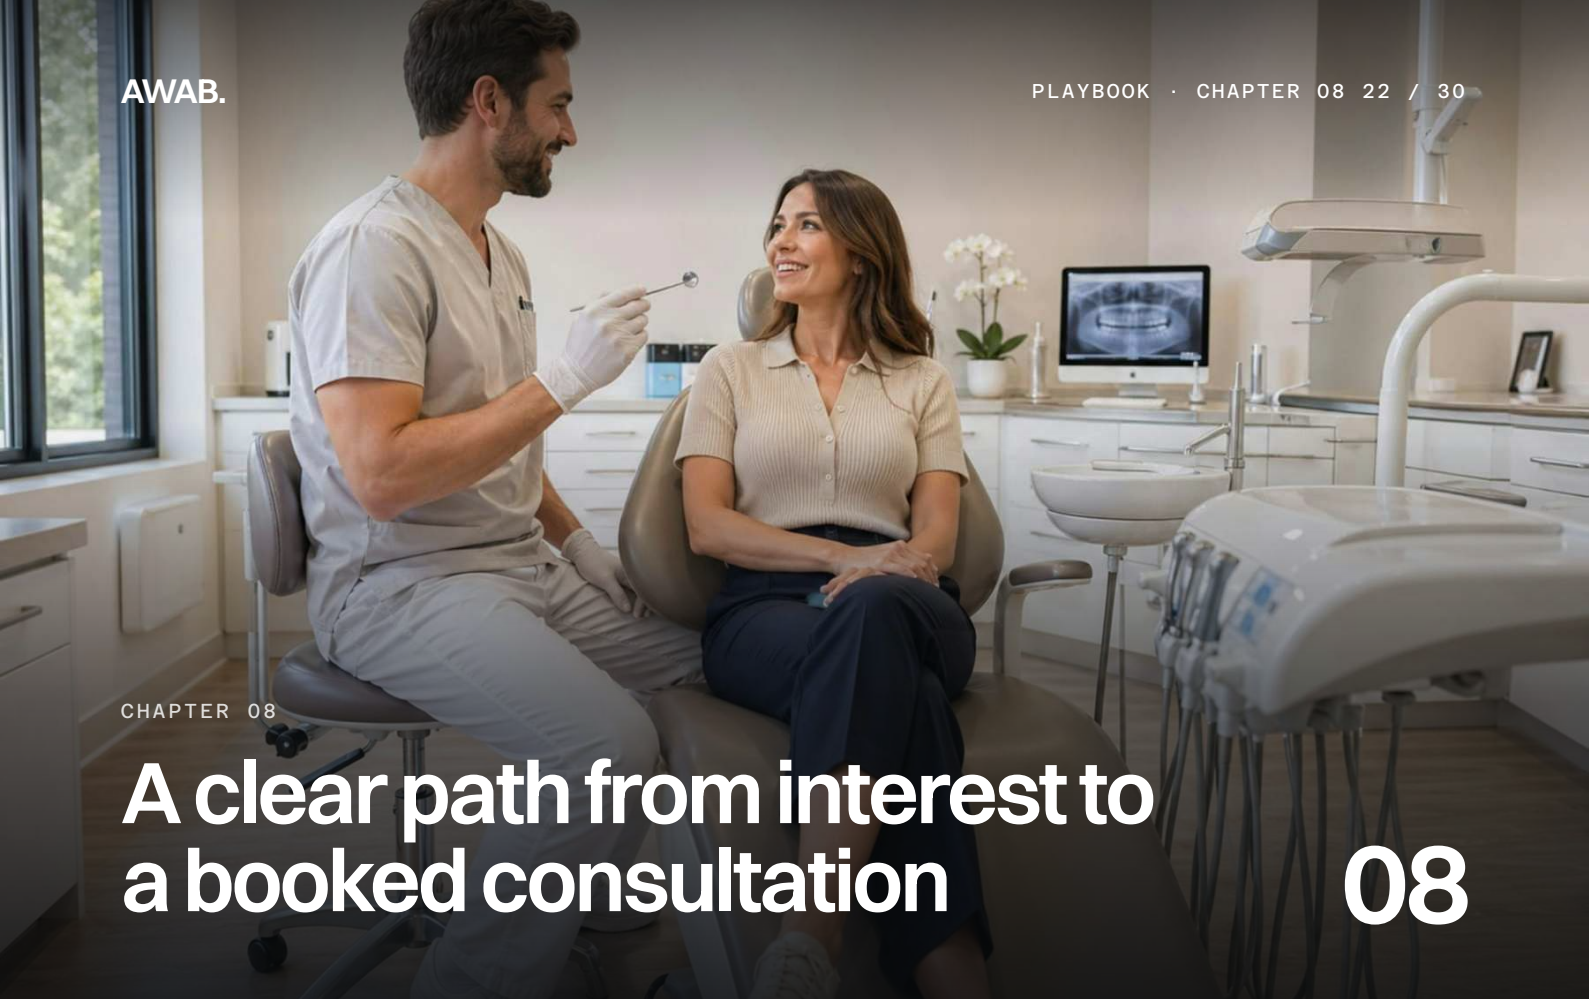

04

- × Different angle or light, which looks fake
- × Only verbal consent
- × No captions
- × After photos taken before swelling goes down

DONE WHEN

Each treatment page shows three captioned cases, each with consent on file.

07

CHAPTER 08

# A clear path from interest to a booked consultation 08

IN SHORT

AFTER THIS CHAPTER

**Patients request a consultation in under a minute and know what happens next.**

READING TIME

3 min

WHAT THE GAP COSTS YOU

Some patients prefer a form, especially in Europe. Without one, they wait.

A long form or silent thank-you page loses people. Unsure it worked, they write elsewhere.

The fix: a short form, a useful thank-you page, a fast confirmation.

## Steps

06

1. **Ask for five things, not fifteen**

   Name, country, WhatsApp, treatment, travel month. Ask the rest later. A photo upload can be optional.

2. **Place the form where patients decide**

   Put it at the end of every treatment page, next to WhatsApp. Also link a consultation page from the header.

3. **Make the thank-you page useful**

   Say who replies and when. Link to the journey page and the doctor. Count conversions on this page.

**4** **Confirm within minutes**

Send an email, and a WhatsApp if you can, in their language. Name the coordinator and ask the three questions.

**5** **Give each lead an owner**

Send each lead to the coordinator for that language, with a backup. Log it in the tracker (chapter 9).

**6** **Offer a time, not 'we will call'**

Offer two video call times in the first reply. A set time makes an appointment.

## Checklist

08

- [ ] Five-field form with treatment and travel month
- [ ] Works in every language
- [ ] Automatic confirmation within minutes
- [ ] Video call time offered
- [ ] Form on treatment pages and a consultation page
- [ ] Thank-you page shows reply time
- [ ] Each lead goes to a named coordinator
- [ ] Form counted as a conversion

TEMPLATES FOR THIS CHAPTER, IN YOUR TEMPLATE PACK

| | | |
|---|---|---|
| T10 | **Consultation form fields and thank-you page** | Template Pack, p. 09 |
| T11 | **Confirmation message after a form submission** | Template Pack, p. 10 |

## Mistakes to avoid

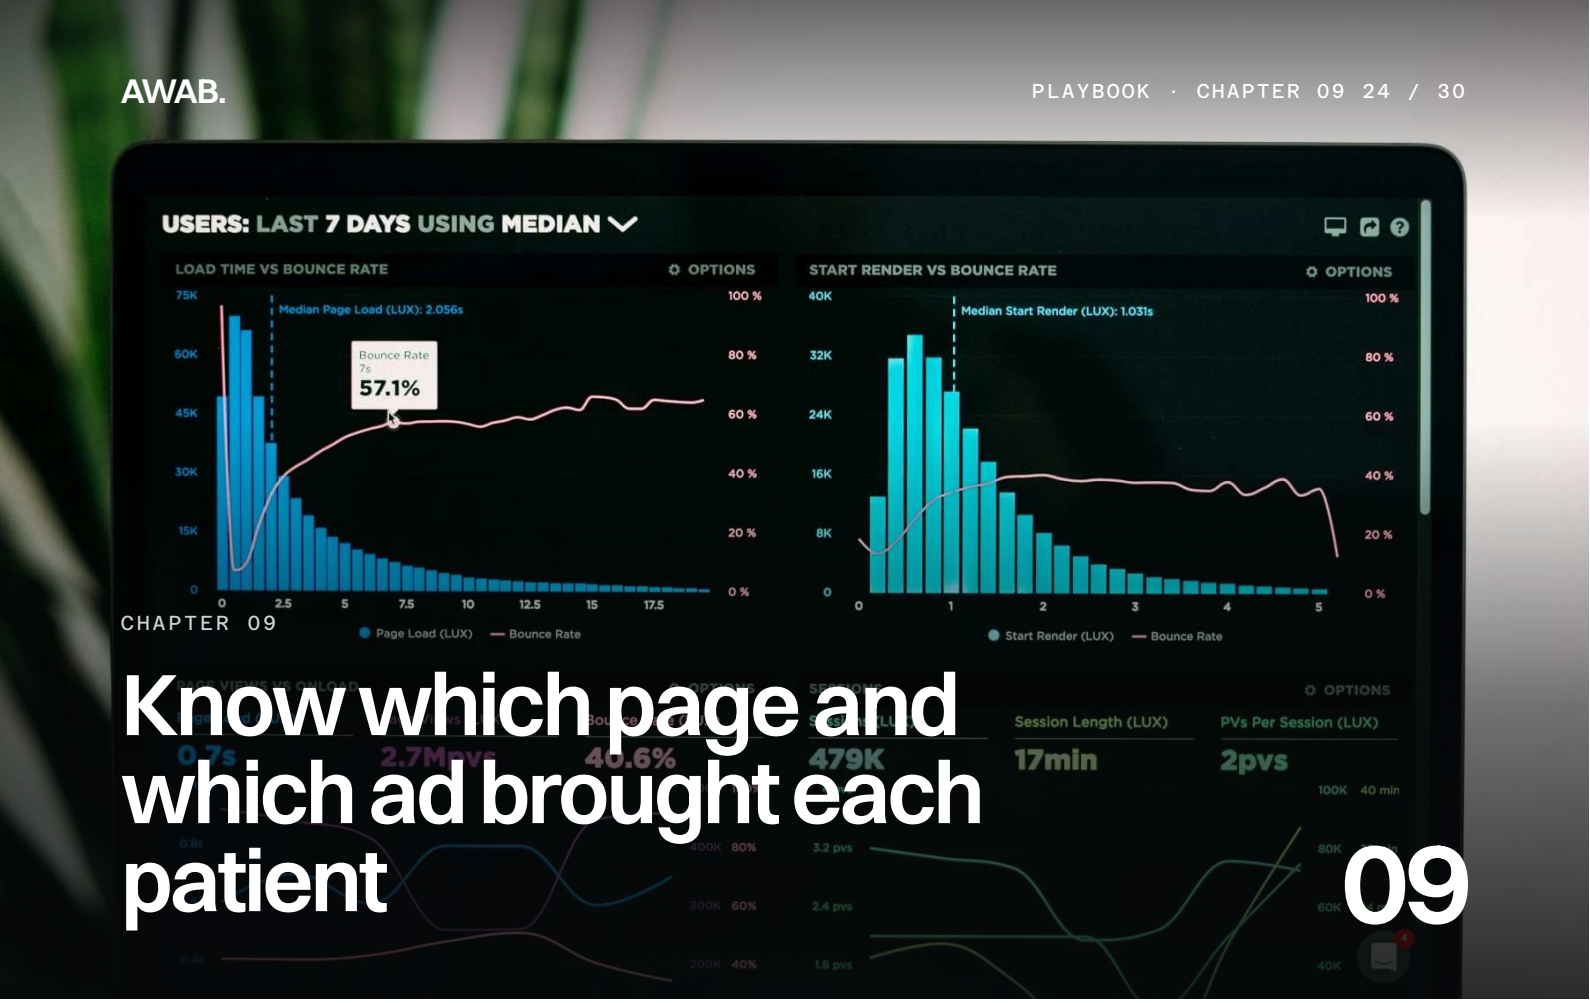

04

- × Twelve required fields
- × Leads in an inbox with no owner
- × A thank-you page that only says 'Sent'
- × Replying the next day

DONE WHEN

A test request gets a confirmation in minutes and shows in the tracker.

08

CHAPTER 09

# Know which page and which ad brought each patient

09

IN SHORT

AFTER THIS CHAPTER

You will know where each lead came from, and Google Ads will learn from bookings.

READING TIME

5 min

WHAT THE GAP COSTS YOU

Without tracking, you guess. You know total spend, but not which ad brought patients.

So you pay for ads that bring chats, and cut ads that bring bookings.

This chapter is technical. But a simple lead sheet already helps.

## Steps

07

1 **Install one analytics tool**

Install Google Analytics 4 (GA4, free visitor statistics) with Google Tag Manager. Put it on every page and make it respect cookie consent. Remove old tags.

2 **Count the actions that matter**

Record WhatsApp clicks, phone clicks and forms as key events in GA4. Add page, language and treatment.

### 3 Name campaign links the same way

Add UTM tags (labels on a link that show its source) to every ad and post. Always use the lowercase pattern below.

### 4 Keep a lead tracker

Keep one row per inquiry, filled in by the coordinator. 'Source' and 'booked' matter most. Review 'status' every Monday.

### 5 Save the Google click ID

With auto-tagging on, Google adds a click ID (gclid) to the link. Save it in a hidden form field. For WhatsApp leads, note page and campaign.

### 6 Send bookings back to Google Ads

Each week, upload bookings as offline conversions (sales that happen off the website). Google then finds patients who book, not just click.

### 7 Review the numbers weekly

Spend 15 minutes each Monday on cost per booked patient, per campaign. Cut what does not book.

## Checklist

08

- [ ] GA4 via Tag Manager, with cookie consent
- [ ] Events carry page, language, treatment
- [ ] Lead tracker, one row per inquiry
- [ ] Weekly booking upload to Google Ads
- [ ] WhatsApp, phone and form as key events
- [ ] One UTM pattern for every link
- [ ] Auto-tagging on, gclid saved
- [ ] Weekly 15-minute review

TEMPLATES FOR THIS CHAPTER, IN YOUR TEMPLATE PACK

| | | |
|---|---|---|
| T12 | **Lead tracker (CSV)** | Template Pack, p. 10 |
| T13 | **GA4 event checklist** | Template Pack, p. 11 |
| T14 | **UTM naming convention** | Template Pack, p. 12 |
| T15 | **Google Ads offline conversion import, step by step** | Template Pack, p. 12 |

## Mistakes to avoid

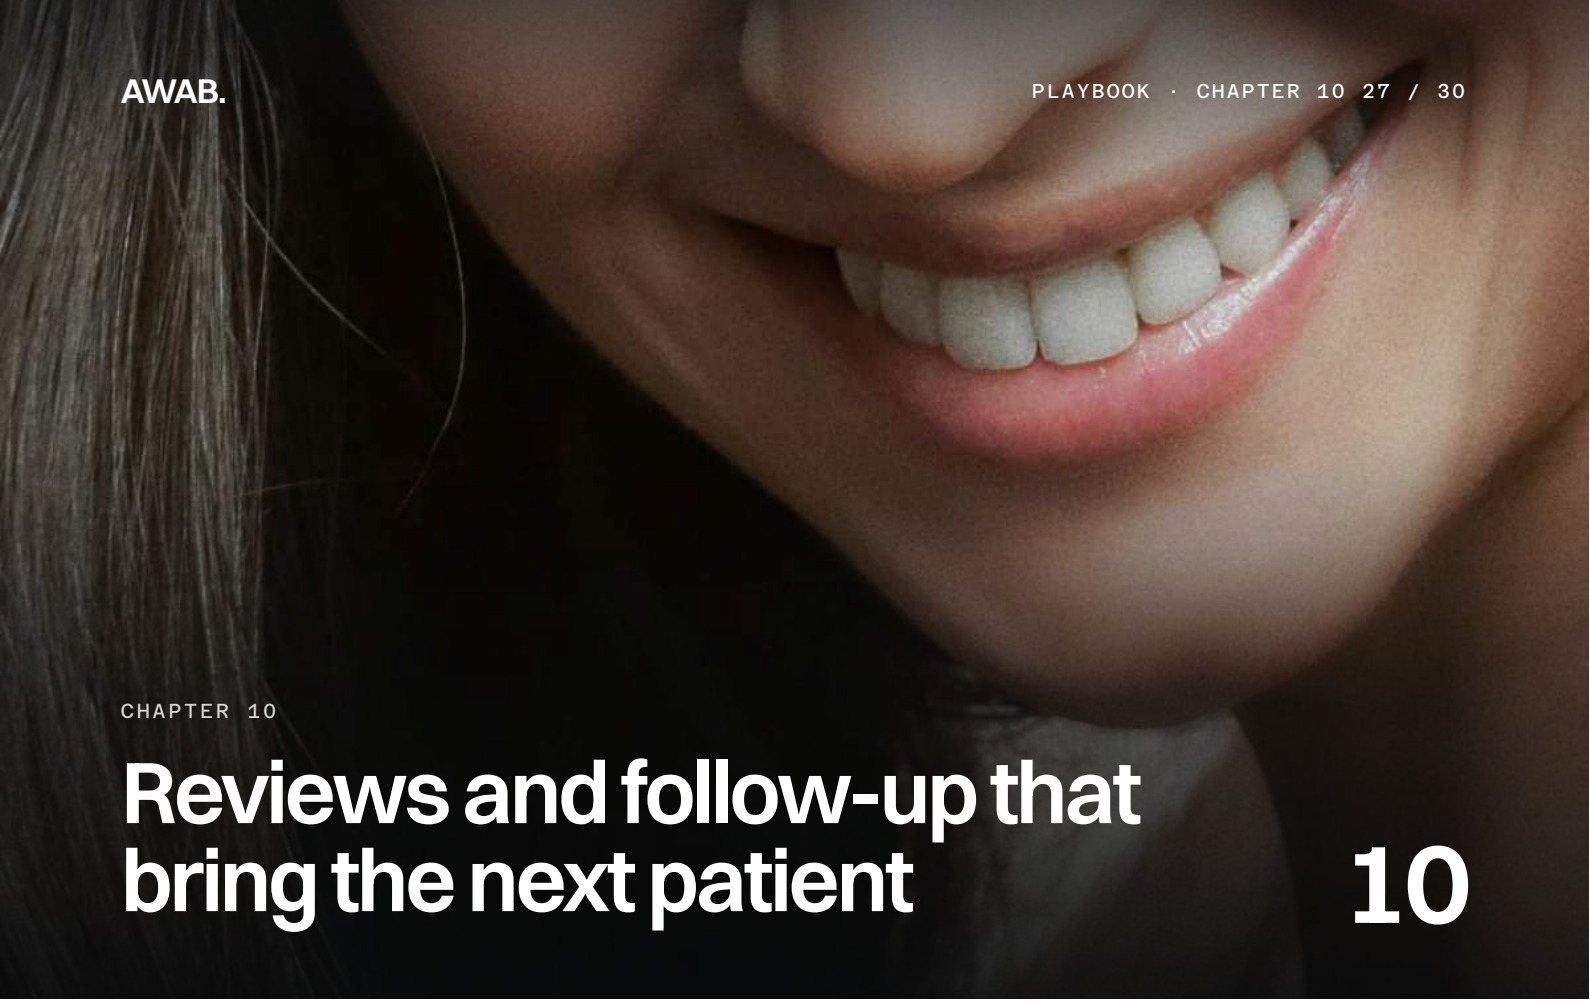

04

- × Reports with clicks but never bookings
- × Three agencies' tags, counting differently
- × UTM links typed by hand
- × A tracker only the agency fills in

DONE WHEN

One sheet shows bookings per campaign, and Google Ads sees them.

09

CHAPTER 10

# Reviews and follow-up that bring the next patient

10

IN SHORT

AFTER THIS CHAPTER

You get a review routine, plus a 30-day plan for the whole playbook.

READING TIME

4 min

WHAT THE GAP COSTS YOU

Patients read reviews first. Ten recent reviews naming the treatment beat a hundred old ones.

Follow-up brings referrals. Patients you contact after they fly home tell their friends.

No software needed. Pick the moment, save the messages, give one person the job.

## Steps

06

1. **Choose the moment**

   Ask at the last appointment, when the result shows, or at the one-week follow-up. Not on day one.

2. **Make it a one-tap link**

   Send the direct Google Business Profile review link. Ask them to mention the treatment and country.

3. **Answer every review within a week**

   Thank by name and treatment. For bad reviews, say sorry, say what you did, move to WhatsApp. Never argue in public.

**4** **Show real reviews on treatment pages**

Show two or three per treatment, with name, country and a link to the original. Change them every three months.

**5** **Follow up on schedule**

Message at one week, one month and six months. Ask for a review, a photo, and referrals. Log each message.

**6** **Update the site monthly**

Each month, add new cases, reviews and patient questions to the site.

## Checklist

08

- [ ] Review moment on the coordinator's checklist
- [ ] Review link saved as a quick reply
- [ ] Every review answered within a week
- [ ] Bad reviews moved to WhatsApp
- [ ] Linked reviews on each treatment page
- [ ] 1-week, 1-month, 6-month messages sent
- [ ] Follow-ups logged in the tracker
- [ ] Site updated monthly

TEMPLATES FOR THIS CHAPTER, IN YOUR TEMPLATE PACK

| | | |
|---|---|---|
| T16 | **Review request and follow-up messages** | Template Pack, p. 13 |
| T17 | **The 30-day plan (and the 2-hours-a-week version)** | Template Pack, p. 14 |

## Mistakes to avoid

04

- × Asking for a review a month later
- × Ignoring or arguing with bad reviews
- × Testimonials with no name or link
- × No contact after payment

DONE WHEN

Every patient was asked for a review, and every review has a reply.

**10**

PRINTABLE

# The 30-day checklist

Pin it to the wall. Tick a box when it is live, not when it is planned.

WEEK 1 — 03 · 08

## Capture

- [ ] WhatsApp Business: profile, hours, away message
- [ ] Pre-filled button on every treatment page
- [ ] First-reply scripts; reply time on the site
- [ ] Five-field form, thank-you page, confirmation
- [ ] Lead tracker started, even on paper

WEEK 2 — 05 · 02

## Answer

- [ ] Rebuild one treatment page; add the price table
- [ ] Write the journey page; add its summary to treatment pages

WEEK 3 — 06 · 07 · 10

## Trust

- [ ] Doctor profiles with facts; "best" claims removed
- [ ] Photo cards in rooms; consent form to the lawyer
- [ ] Review link and follow-ups saved; reviews answered

WEEK 4 — 09 · 04 · 01

## Measure and speed

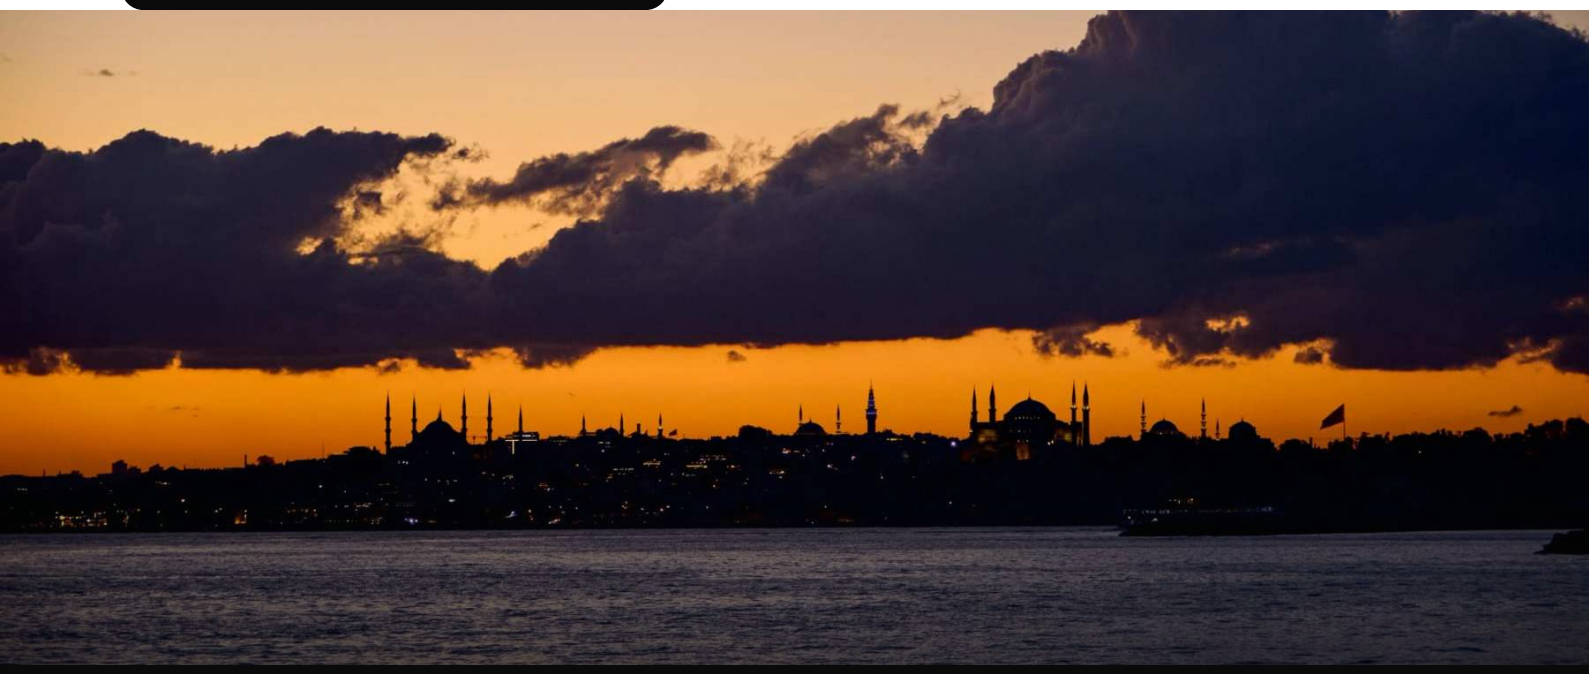

- [ ] GA4 events; UTM pattern shared
- [ ] Auto-tagging on; gclid saved; first offline upload
- [ ] Images compressed; video and sliders gone; speed log
- [ ] Translation brief sent for language one

TEMPLATE PACK Your Template Pack, a separate PDF with all 17 copy-paste templates from these chapters, arrives by email in 2 days.
